

I am opposed to this petition because Qwest is the only provider of DSL service in my area, and as such there is no competition to keep the prices for the hardware connection in check. With competition for the ISP portion of my DSL connection, I receive better service and more options from other providers. If this were to disappear, my current service level would be reduced and I would pay more, as there would be no competition.

Please do not allow Qwest to have a monopoly on DSL in my area.
